J&J Network Engineering Co., Ltd.

Empower Environmental Management Solutions

to create a

GREENER WORLD

About us

Established in 2004, J&J Network Engineering Company Limited is a leading system integrator in Building Automation and Controls. We have successfully gained a group of renowned customers and J&J is recognized in the Building Automation and HVAC Control industry for excellent products and service quality with quick response to address customers' needs. To further address the needs of China customers, we have established our China office, Shenzhen Heng Yi E&M Company Limited in 2004 and has been successful in many clean room and pharmaceutical projects.

Public Transportation Interchanges & Carpark Air Quality Control

Building Management System

J&J's core competence is to provide one-stop engineering solutions that take care of every aspect from feasibility study, equipment selection, system design and installation to round-the-clock maintenance services.

PTI & Carpark Air Quality

With our extensive knowledge and experience, while basing on Environmental Protection Department (EPD) requirements, J&J provides design in building management and monitoring systems in PTIs / carparks to ensure the air quality is at the safety level.

Staircase Pressurization System and Smoke Extraction System

Being professional in staircase pressurization, smoke control and fire protection, J&J provides customers with tailored service packages for a wide variety of building and product types.

Life Science

J&J has been providing Clean Room Solutions by integrating and collaborating different systems together to form a user friendly dashboard, which provides customers with a consolidated view of all the key parameters, such as temperature, humidity and differential pressure.

Our Partners

All these products are widely adopted in MVAC, clean room, hospital, pharmaceutical factory, commercial and residential building projects. With the full range of products, J&J offers one-stop solutions to ease the hassle of customers from sourcing from different providers.

Mission

To be the preferred building management solution partner helping customers operate their facilities in the most efficient and economical ways, creating competitive advantage for customers.

GOTOgether

Capability

J&J provides a wide variety of services in building management service and implements services starting at pre-construction that run through the construction and post-construction phases. Our team leaders have over ten years of working experience in the market of Automatic Controls (DDC & PLC) and Building Management System.

Being a solution integrator, J&J has proven record of coordinating with different equipment and solution providers to complete a project. We also work closely with customers to understand their requirements, goals and expectations of the project. By identifying cost-effective solutions with proper design and on-going monitoring and maintenance tools, we pride ourselves on excellent design and solutions within budget, and completion while respecting all deadlines.
